

Openoffice

Open a text file in excel:

1. Execute command: soffice
2. Click the button: "Spreadsheet".
3. Click File->Open to open the file selection window. Change "File type" to "Text CSV (*.csv; *.txt; *.xls)". Select the file you want to open. Click "Open".

Save as an tab delimited text file from open office:

1. Click "File->Save As".
2. Change "File type" to "Text CSV". Type the file name you want to save as. Click one of the icons on the top right corner to choose the directory.
3. Click "Save". If you are asked about what "delimiter" to use, choose {Tab}.
